

TESTIMONIALS

Missing Link[®] Canine Formula

I would like to thank you for Missing Link[®] for Canines. I have a 3-year-old male collie who is allergic to everything. I have spent over \$3,000 trying to improve his quality of life and relieve the itching and discomfort his allergies have caused. A man who has shelties suggested I try your product. And never have I ever been so amazed with a product; within 22 days his sores were gone and no itching. It has now been 60 days and he has hair covering all of his body. I only wish I had "before and after" photos. -*Kim Estlund, Miami, FL*

Veterinarians could not figure out what was causing my four-year-old collie to continue to have rashes and dried-up skin over two-thirds of her body. The usual protocol of antibiotics, anti-inflammatories, antihistamines and medicated baths did not work. After Sweetpea was introduced to Missing Link[®], her symptoms cleared up and her demeanour changed from acting tired and listless to that of energy and alertness. I am hooked on Missing Link[®]. There is nothing like watching your dog act like a happy, healthy puppy again. -*Michael Rotsten, Encino, California*

Proof is in the seeing, seeing is believing. How can I not get excited when I see and feel the coat on my dog (purebred, show-dog, Siberian Husky). The colour and texture have made all the difference in the world, and I have a good winning record, but since I started using the Missing Link[®], the results are breath-taking. All weekend, at the last show, where I met people I know, and strangers, they could not stop talking about how good my dog looked. The change in my dog, in my mind, is solely due to your product. Over the past weekend, due to Nikki's results, entire kennels have put your product into their dogs' diets. They know first hand what my dog's coat was like (dry, sunburnt and colourless). I have been asked if I dyed my dog's coat! -*G.A., Victoria, BC*

I've been a professional pet groomer for about 17 years now. I've seen vitamins and supplements of all kinds that promise to work miracles. I do believe I've found the best in your Missing Link[®]. All of my own dogs and cats are on The Missing Link[®] and doing well. I am personally using The Missing Link[®] in my orange juice every morning and I can sure feel the difference! Several of my clients are using The Missing Link[®] with great results. One little cocker spaniel has had especially great results. This dog is ten years old with thyroid problems. After 2 months on your product, there is a very noticeable amount of new hair growth. After 3 months, you can barely tell that this dog ever had any hair loss! She looks great! And I am sure it's because her owners are giving her The Missing Link[®]! I truly believe you have a really great product and I highly recommend it for animals, and humans too!! -*Cassie Pritchett, Owner of The Dapper Dog*

I just want to take the opportunity to let you know how much I like your Missing Link[®] product. Since I started using the product almost 2 years ago, I have used no other supplement. I used to use a vitamin supplement and a supplement for coats, as I have American Cocker Spaniels. I also have a couple of dogs that have been on Solixine, a medicine for a low thyroid condition. After 3 months of using The Missing Link[®], we reduced the dosage of Solixine. I believe the kelp and zinc must be a good factor here. All my dogs are fed The Missing Link[®]. The old ones seem brighter and more alert. They also grow hair like crazy. I want the show dogs to have a nice coat and they really do. I keep a lot of the old-timers' coats cut down into puppy cuts, and since putting them on The Missing Link[®], they have to be cut more often. This product seems to have a big effect in a positive way on the dogs with skin problems and flea allergies. Since I do grooming for a lot of Cocker pet owners, I have recommended this product to them and guess what! Instead of coming in every 8 weeks for a haircut, they now come in every 5 or 6 weeks. That's more money for me. We have a 17-year-old Doxie, and two years ago, we were thinking of having her put to sleep. I bought The Missing Link[®] and put her on it and she is more spry and chipper than she was at age 13. I

doubt she will be departing for Dog Heaven any time soon, as she refuses to give up. She likes her Missing Link[®] too well! I have seen some of my customers' dogs with tough black skin and no hair in those places. After being on The Missing Link[®] for 6 months, these dogs have almost normal skin and a full coat of hair where there once was none. I also like what it does to the colour of the coat. My blacks are black and my reds are red. Bright and shiny and not dull. Since I believe in this product so much, I now sell it in my shop and to Dog Show exhibitors. -*Dottie McCoy, Glen Arden Cocker Spaniels*

Hi, I just wanted to drop a note because your product, Missing Link[®], is incredible. I have a 4-year-old collie that I show in Breed, Obedience, Agility, Flyball and Herding. He's very active, but for the last 2 years we've been battling Colitis something awful. Usually about a week after the show, it just hits him.

He dropped 5 lbs. during the year because of the Colitis and not eating. My handler suggested I try putting him on Missing Link[®] to see if we could get some more coat on him (he's an indoor dog). He had loose stool when I put him on it and we had just finished a show. From that day on, not only does he suck down his food (which he never did before), but his stool has been incredibly firm. It's been 3 weeks and he's been in stress situations and no change. I can't tell you what a difference your product has made. I've been telling everybody. I don't care if he gets more coat or not at this point, I'm just happy his body is finally able to utilise the nutrients he's being fed. It's just wonderful. Thanks again for a wonderful product. -*Noreen Bennett*

Believe me, I rarely—if ever—write a "fan" letter to a company about their product. But when I found this web site, I just had to contact you and the company. I saw Missing Link[®] at my local pet supply store (*Collar and Leash* here in the San Fernando Valley in Los Angeles) and I bought it because I was looking for vitamins for my dog. My dog is a rescued Sheltie—about 5 years old—and his beautiful coat had turned dull and he was scratching constantly. It got so bad, sometimes he could barely take a step without stopping and scratching furiously. The groomer said he had fungus patches on his skin. Well, after maybe a week of giving him Missing Link[®] every morning in his food, his scratching stopped and his skin got better and his coat looks great. I didn't know about the other benefits until I saw this web site. (And by the way, he loves the taste!) So I just wanted to thank the company for a wonderful product, and I have already highly recommended it to others. -*Shelley Butler*

I just wanted to write to you to let you know that The Missing Link[®] for Dogs has worked an absolute miracle on my dog. My dog Bear (pit bull & chow) was plagued with allergies for almost 1-1/2 years. I had gone from vet to vet in search of answers, spending hundreds of dollars. All thought it was an allergy to flea bites, but I'm not 100% convinced now that was the problem. The 'usual' route of steroids and antihistamines weren't working, in fact I feel they caused more problems. She would get staph infections, hair loss and just a general poor-looking quality about her. She also was having seizures. I had started feed her a special dog-health food since I had found much research indicating many allergies in dogs were a result of what is contained in dog foods these days. While I did see an improvement, the problems were still there. Then I ran across The Missing Link[®]. Although sceptical due to having tried other supplements, I tried it in desperation. *WOW!* Within about 6 weeks of giving Bear a double dose, I started to see a difference. Today she is like a different dog. Her coat is more glorious than it has ever been in her life (she is now over 6). No staph infections, itching or hair loss. Bear is off ALL steroids and antihistamines for 3 months now and she just keeps improving. She is even down to half of the original dose of Phenobarbital to control her seizures. I'm hoping, with time and Missing Link[®], she may even be able to be off this medication completely. I continue to double dose Bear with Missing Link[®] daily. I tell everyone about your product. And I've even converted my vet. When she saw Bear after a few months, she couldn't believe her eyes. She now recommends Missing Link[®] to all her patients with allergy problems. I should note to you that absolutely nothing, other than giving Bear The Missing Link[®] was

changed in what I was giving her. It positively was what caused her dramatic turnaround. So a huge *THANK YOU* from me and Bear. Please don't ever change or quit making this product. I have even started taking the human formula. Thanks again for a great product. -*Lee Rogers*

I just had to write to compliment you on your product. My poor dog had dull fur and spots of missing fur. The vet said it was either a food or flea allergy. She was put on medication and her food was changed, but she still looked awful. While listening to *Dr. Dog*, I heard of your product, but thought it *can't* be that good. After waiting a while, I finally decided to try your product. We were amazed—after about one month, she looked great. I'm sure she feels better too. Her fur is thick and shiny now. She will continue to use Missing Link[®] to stay that way. Thank you for making her beautiful again. P.S. My cat is on Missing Link[®] too—and she looks great! -*Iline Rowe*
